Projects

CommonwealthBBQ.com | HTML, CSS, WordPress, PHP, Adobe Illustrator

- Developed and designed based on the strengths of the restaurant and their branding, with the intent to streamline catering orders, encourage customers to online ordering, and create a stronger online presence.
- Customers are more well-informed of the catering service, time spent processing orders has greatly reduced.
- **Catering sales for 2021 are up 23.5% compared to 2019**, the restaurant's busiest year for catering.

Heavy Weather - github.com/thomascvieira/heavy-weather | React, CSS, Figma

- Weather application functioning as a technical demonstration for React development, making API calls, and working with JSON backend data.
- Includes useState, useEffect, ES6 syntax, reusable components, routing, asynchronous functions, and multiple error handling methods.
- Uses GitHub for version control, deployed using GitHub Pages

ThomasCVieira.com | HTML, CSS, WordPress, PHP, Figma

- Portfolio site created to display development and design work as well as the personality of the creator.
- Created with responsive design as a top priority using Flexbox and Grid.

Work Experience

Commonwealth BBQ | Cook/Shift Supervisor | June 2014 - Present

- Worked as a line and prep cook, engaged with customers at the register, cleaned, washed dishes, and did anything else necessary for the success of the restaurant.
- Earned promotion to shift supervisor and keys to the restaurant.

Office Depot/Office Max | Print/Sales Associate | December 2018 - April 2019

- Operated numerous printing machines and communicated with clients to accurately take in and complete jobs.
